

HI-SEAS: MARS ON EARTH

Dr. Kimberly Binsted

JOIN FORMER NASA EMPLOYEE,
DR. BINSTED AS SHE DISCUSSES:

Mars - the red planet - is the only other planet in our solar system that has a day and a year similar to Earth's. It is the only planet in our solar system that has a thin atmosphere and a polar ice cap. It is the only planet in our solar system that has a magnetic field. It is the only planet in our solar system that has a large volcano. It is the only planet in our solar system that has a large canyon. It is the only planet in our solar system that has a large lake. It is the only planet in our solar system that has a large river. It is the only planet in our solar system that has a large ocean. It is the only planet in our solar system that has a large continent. It is the only planet in our solar system that has a large island. It is the only planet in our solar system that has a large city. It is the only planet in our solar system that has a large country. It is the only planet in our solar system that has a large world.
